

Public Maps Gallery Template version 1.4 – Changes

This document is a list of changes and enhancements made to Public Maps Gallery template after the version 1.3.1 release. For more information, see the Public Maps Gallery Template Quick Start Guide.

- All configuration files are now located in the 'config' folder:
 - settings.content.js
 - settings.optional.js
 - settings.required.js
- Anything to do with template content (e.g. descriptive text, logo, email, links, etc) is now available for editing through the configuration files.
- You can edit the configuration files to:
 - Set a theme which defines all colors used throughout the template
 - Choose which map viewer to load. By default the map.html is loaded but you can now set it to load ArcGIS online or ArcGIS explorer instead.
 - Show the basemap gallery. This feature can be turned off
 - Show group search for homepage that can filter maps for large groups. This can be turned off
 - Group search has an auto-complete dropdown as well.
 - Search for locations on the map page view.
 - Address location has auto-complete dropdown too.
 - Turn off embedding on the map page.
 - Show a layer toggle option in the About section on a map view. This can be turned off.
 - Choose between list or grid view. This toggle can be turned off.
 - Set default layout (e.g. Grid or List).
 - Show overview of the map. This can be turned off.
 - Turn off the more information option in the about tab on the map page.
 - Turn off pagination.

Other enhancements:

- Removed banner background images. The gradient is achieved using CSS now.
- Removed carousel view. The carousel may be made into a separate template.
- Removed Group ID finder page from the template and made it into [its own web page](#).
 - The Group ID finder tool just uses username now to avoid ampersand bug.
- Fixed bug with legend items not showing correctly.
- New fullscreen button on map page.
- Added Geolocation to map.
- Fullscreen view now shows legend if legend is showing already.
- Fullscreen view shows locate box as well.
- Updated to use api version 2.5 and jquery 1.6.4
- Favicon changed to a generic grey color.
- Banner image is transparent generic overlay.
- Made it easier to use a portal site instead of arcgis.com from the config using the arcgisURL property.

Version 1.4.1 – Changes

Here is a list of changes and enhancements made to the version 1.4.1 release.

- Support for using the template with private ArcGIS.com groups and items.
- Configuration option to hide footer.
- Configuration option to hide social media icons.
- Configuration option to open explorer view in presentation mode.
- Social media sharing icons are now using Addthis.com.
- ArcGIS JavaScript API updated to version 2.7.
- jQuery Library updated to version 1.7.1.

- Created a tool for generating ArcGIS.com tokens.
<http://www.esri.com/public-maps-gallery/token-tool/index.html>
- Various minor bug fixes.
